SBCC Committee Member,

I urge you to remove code proposals 21-GP2-065 and 21-GP2-066 from the State Residential Energy Code.

Washingtonians value Energy Choice. Natural gas is a safe energy source that will keep construction affordable, improve the reliability of our electric grid, and preserve the lifestyles Washingtonians enjoy. Having multiple choices for running appliances and heating homes also makes us more resilient when natural disasters strike.

Let's be wise in our approach to meeting GHG goals and utilize energy efficient products and design.

Please support energy choice and remove code proposals 21-GP2-065 and 21-GP2-066.

Sincerely,

Andrea Hixson
